A message from Dale Bramley:

Our DHB serves more than 575,000 people – the largest population of any DHB in the country. We also have the fastest growing population of New Zealand’s 20 DHBs, as well as one of the most diverse. As an organisation, we are constantly looking at ways to better meet the needs of the communities we serve.

Healthcare is ultimately about people leading long – and healthy – lives. Research, education and innovation are crucial to the ongoing development and refinement of our approach to health care delivery.

This special lecture in partnership with AUT is designed to stimulate debate about our healthcare system with a focus on lessons learned overseas, as we strive to continually improve the services we offer.

Professor Martin McKee CBE MD DSc

Martin McKee qualified in medicine in Belfast, Northern Ireland, with subsequent training in internal medicine and public health. He is Professor of European Public Health at the London School of Hygiene and Tropical Medicine where he founded the European Centre on Health of Societies in Transition (ECOHOST), a WHO Collaborating Centre. He is also research director of the European Observatory on Health Systems and Policies and President of the European Public Health Association. He has published over 820 academic papers and 44 books and his contributions to European health policy have been recognised by, among others, election to the UK Academy of Medical Sciences, the Romanian Academy of Medical Sciences, and the US Institute of Medicine, by the award of honorary doctorates from Hungary, The Netherlands, and Sweden and visiting professorships at universities in Europe and Asia, the 2003 Andrija Stampar medal for contributions to European public health, in 2014 the Alwyn Smith Prize for outstanding contributions to the health of the population, and in 2015 the Donabedian International Award for contributions to quality of care. In 2005 was made a Commander of the Order of the British Empire (CBE). He has an active following on Twitter as @martinmckee. Read Martin’s BMJ profile.
The easiest way to get to the Lower Ground Floor is via the main lift lobby area.
